

Baader Solar Viewer AstroSolar® Silver/Gold seen from outside with cool (heat-reflecting) dual metallized AstroSolar® Silver Film

INVEST IN THE BEST: Solar Viewer AstroSolar® Silver/Gold

MADE IN GERMANY

On August 21st 2017 every solar enthusiast will need an eclipse viewer to see the Great American Eclipse in USA. Many cheap and unsafe products are offered – we have a better alternative with our 25 years of experience in producing solar filter equipment: **Baader Solar Viewer AstroSolar® Silver/Gold**

FEATURES – Baader Solar Viewer AstroSolar® Silver/Gold

- **Made in Germany**
- **No Reflections:** the anti-reflective, UV-absorbing “Gold”-Film mounted inside guarantees a most comfortable viewing experience
- **Absolutely Safe:** meets and largely exceeds the latest EN ISO 12312-2:2015 standard for eclipse viewers. Each and Every Viewer is tested to ensure its safety
- **Crystal Clear and Tack Sharp:** the same crystal clear views as their renowned AstroSolar® film used for over 25 years by professionals and amateurs for high magnification telescopic observation
- **True Color Views:** No other viewer presents the sun as close to its real color – WHITE (not reddish)
- **Four languages:** safety instructions in German, English, French and Spanish language printed on the inside of each viewer
- **Story:** each Solar Viewer AstroSolar® Silver/Gold printing artwork explains in vivid images what actually happens during an eclipse
- **Safe storage:** each viewer packed individually in protective poly-bag
- **Optional Counter Display:** 100pc display packs, ideally suited for display at registers and countertops, each viewer packed individually

Baader Solar Viewer AstroSolar® Silver/Gold seen from inside with anti-reflective UV-absorbing AstroSolar® Gold Film (black appeal)
