### Eyepiece Dimensions

- **A**: Height of eyepiece-body above reference plane
- **B**: Length of 1¼" barrel
- **C**: Length of 2" barrel
- **D**: Outer Diameter

### Spreadsheet notes

1. **FL**: Focal Length
2. **E/G**: # Lens Elements / # Groups
3. **AF**: Apparent Field of View
4. **ER**: Eye Relief
5. **G**: Parfocal Group
6. **FS**: Field Stop Ø
7. **BFG/C**: Back Focus Gain when using 2" barrel (compared to 1¼" barrel)
8. **SPS**: Slip-Protect Safety (SK = Safety Kerfs | RA = Recessed Area)
9. **PVA**: Photo-Video Adapter Thread, 43mm Standard
10. **Weight**: Eyepiece net weight w/o dustcaps, including M43-threaded eyecup (Eyepiece net weight: 5 g / 0.17 oz)

### Scope of supply (included items)

- 76° Morpheus eyepiece w. rubber/metal foldable eyecup (M43-threaded), winged/foldable eyecup for binoviewing, storage-box, three dustcaps, M43 extension, cordura eyepiece holster (1pc) and focallength indicator clip.

### Optional accessories

- Baader Utility Bag - for small accessories
- #2958080 #2954201
- #2954251 #2954251

---

All technical data provided are based on unaltered mechanical and optical design data. Values measured in the field depend on users telescopes or evaluation techniques and may vary greatly - especially when obtained with catadioptrics of variable focal length.

Note: The reference surface is not just the point were - on some eyepiece designs - the housing and barrel come together. Actually the reference plane is also the focal plane of the eyepiece and must be coincident with the image plane of the telescope in order to reach focus.

---
